

# Supporting and Engaging Families Virtually

1. Provide families with opportunities for training around the virtual classroom

2. Provide families with the information they need for a session ahead of time

3. Develop strategies to help families with varying needs to support their children during virtual learning

4. Offer assistance to families on how to work on a child's individual goals or family-specific needs

5. Vary your modes of communication to match family preferences and needs

6. Schedule check-ins with all families to ask about their needs, experiences, and perspectives about their child's engagement and progress

7. Be sure to have more contacts with families that are positive than about addressing challenging behavior
